Experience Designer working across digital interfaces, physical environments, and immersive media. I turn research into experiences people can actually use, from exhibitions and product concepts to Figma prototypes and hands-on installations. Storytelling shapes how I design and defend direction with cross-functional teams, alongside hands-on experience in user research and usability testing and a strong interest in AI-enabled experiences and emerging technology's impact on user behavior.

EDUCATION

University of Wisconsin–Madison | M.S., Design + Innovation (Engineering) Sept 2025 – Aug 2026

GPA: 4.0/4.0

Indus Valley School of Art & Architecture | B.Des., Communication Design — Graduated with Distinction in Thesis

Jan 2017 – Dec 2020

PROFESSIONAL EXPERIENCE

Independent

May 2024 – Jan 2025

Freelance Designer

- Designed end-to-end brand identities for businesses including MagicBox and Mr. Whiskerworth's, translating brand concepts into cohesive digital and physical touchpoints.
- Created visual systems, packaging, digital experiences, and storytelling-driven brand assets.

AA Joyland Pvt. Ltd

May 2023 – May 2024

Creative Lead

- Led experience design and brand strategy across four entertainment brands, shaping how customers move through and interact with physical spaces.
- Directed cross-functional teams of 5 designers across digital, print, and environmental experiences.
- Built scalable design systems spanning websites, marketing, and physical touchpoints.
- Collaborated with project managers, developers, and stakeholders to define product requirements and design solutions.

Azcorp Entertainment Pvt. Ltd

Apr 2021 – Jan 2023

Lead Designer & Illustrator

- Created illustrations and comic content for UNICEF and Malala Fund's national #GirlsCan and #BackToSchool campaigns, reaching audiences across Pakistan through broadcast, digital, and print channels.
- Managed the full creative pipeline from storyboarding and illustration through to final content design for social impact campaigns.

Additional Experience: Creative Intern, VCast Online (2020) — Creative Intern, Ogilvy & Mather (2019)

ACADEMIC PROJECTS

Dolled Up VR

2026

- Designed, developed, and tested an immersive fashion experience in Unity blending virtual exploration, outfit selection, and interactive posing mechanics — translating interaction and visual design into a fully sensory, spatial experience.

How Do We Love? (Cupid on Earth)

2026

- Designed Cubot, a companion character for a speculative civic design exhibition, developing its physical form in Blender and building a fabricated prototype tested on location in Madison.
- Built the accompanying brand system, UI style guide, and a narrative video sequence to translate speculative research on care and infrastructure into a cohesive sensory experience.
- Collaborated with PBS Wisconsin and incorporated their feedback throughout the summer semester to help develop and refine the project.

WayHome

2026

- Conducted user research and journey mapping to identify challenges faced by students experiencing urgent housing needs.
- Designed user flows, wireframes, and interactive prototypes for a mobile app that streamlined housing search, resource discovery, and decision-making under time pressure.

SKILLS

Figma (Design, Prototyping, Figma Make) · Interaction Design · Experience Design · Storytelling & Visual Communication · UX Research & Synthesis · User Flows · HTML · CSS · Wireframing · Usability Testing · Accessibility · Adobe Creative Suite · Procreate · Unity · Blender · AI Tools (ChatGPT, Claude, Midjourney, NotebookLM, Gemini)
